

MUDFLAP STYLES & DESIGNS

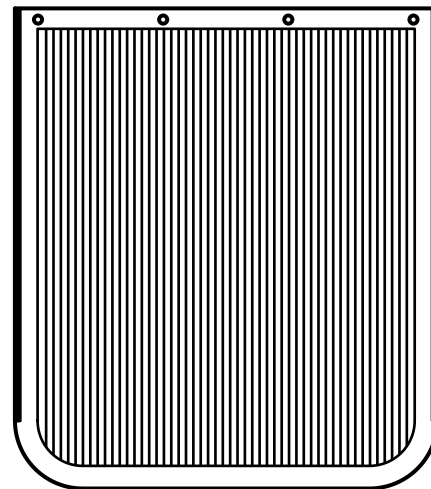

TRIPLE BAR STYLE

This NEW convertible flap design adapts to three popular sizes for maximum utility. Molded rubber flaps resist chipping, cracking, tearing and curling. It is formulated to withstand severe temperature changes in the most rigorous heavy duty highway conditions. Available in various sizes with pre-drilled holes for easy installation, it is constructed with Standard Duty Rain-Master backing included at no extra charge. Raised rubber letters and logos (optional) give a three dimensional appearance for a first quality image that lasts. You automatically maximize the space in your storage area because only one size of mudflap is required. This mudflap can be easily converted to either a 24" x 27" or a 24" x 24" size. The ultimate multi-tasker!
