RUBBER PIONEERS FOR OVER 100 YEARS
Who is AMERICAN BILTRITE?

American Biltrite was founded in 1908 and is owned and run by the third generation of the Marcus family. Since our inception, American Biltrite has continued to grow and work to build a solid reputation for high-quality products and service for our customers. In 1913, American Biltrite opened the Sherbrooke, Quebec production facility. Rubber became the major focus and categorically the vocation of CHOICE for this location.

We are a family of over 250 people, dedicated to set industry standards with a relentless drive to develop new products and custom formulations for every conceivable application. Globally, American Biltrite counts more than 750 employees worldwide.

We are quality, ISO 9001 certified, there is no substitute for the reliability of our quality procedures.

We are innovation, with the most cutting-edge research and development team. At American Biltrite, we are passionate about creating exclusive products for distinguished customers.

We are service, at American Biltrite, you are a valued partner and this entitles you to outstanding service.

“Quality materials in stock, strong service, and consistent pricing have made American Biltrite a valued long-term supplier who helps bring stability to our supply chain.”

Kerry Carter, Procurement
Norwesco Industries Ltd.
Trusting American Biltrite since 1975

At American Biltrite
OUR PEOPLE MAKE THE DIFFERENCE
EMPLOYEE TESTIMONIALS

Working for American Biltrite is really a good thing for me. 5 different positions, and after 40 years, I’m still here! I have often recommended people to come work at American Biltrite, because it’s a good company, we have good benefits, and it’s a fun place to work.

ÉDITH LEMIEUX  
Credit Supervisor  
Employee since 1978

In the 38 + years I’ve been here, not one day has been the same as the previous. I feel like management trusts my decisions and supports me in my daily work. What gives me great satisfaction is the knowledge that at the end of the day our customers are satisfied with the service and products we provide. It gives me a real sense of pride to be a team member of this forward-looking and growing company.

GINETTE MEADE  
Customer Service  
Employee since 1980

I am fortunate to work with smart, versatile people who are not afraid to take on new challenges. Working with people who want to perform and improve themselves through the manufacturing of our products, and contributing to the reduction of different waste sources through different continuous improvement projects is motivating.

MICHEL GAGNON  
Process Control and Continuous Improvement Director  
Employee since 2006

At American Biltrite, we care about our products, we care about our colleagues, and we care about our customers. The minute I started working at American Biltrite, I felt like I was being welcomed into a new family. They really take care of their employees, and you can feel it in the working atmosphere. Working at American Biltrite is motivating because your work is valued and you feel like you are making a difference. The team here has welcomed me with open arms and encourage me to bring new ideas to help us be more efficient and have a better reach in our marketing activities.

TESSA TROT  
Communications coordinator  
Employee since 2018

We each have a role like being a member of a family. It takes many people of different generations and with different skills, to make the team complete and succeed. I was once told by a production leader that if we do our best as an individual, that effort will be noticed, regardless of the task. We know there is a future here, always new investments being made in equipment and staff.

ROBERT DAVIDSON  
Product Manager  
Employee since 1975

I like thinking outside of the box. Whether it be our external sales team, our planners, or our customer service reps, we are always trying to do right by the customer(s). Thriving to develop/customize new products for an evolving industry, creative new ways of adapting our marketing techniques, and of course, most importantly, streamlining our customer service responsibilities.

KAREN MATTHEWS  
Customer Service  
Employee since 2014
DISTRIBUTION CENTER LOCATIONS
The products that you need, close to you!

- Nine fully-stocked warehouses across the United States and Canada
- Stock items ship same or next business day
- Broad product inventory assuring availability
- Warehouse pick-up available for local customers

“At Canada Rubber Group (CRG), we place a great deal of importance on our supply chain. We work with a variety of great suppliers from around the world so that our customers get what they need, when they need it. In order to satisfy our customers, we need suppliers that don’t cause us to experience production delays, quality issues, or any other forms of costly interference. CRG would recommend American Biltrite for any business seeking to enjoy long-term, collaborative, strong supplier relationships.”

Gord Sirrs, President
Canada Rubber Group Inc.
Trusting American Biltrite since 1991
CAPABILITIES

ROLLS, SHEETS, AND SLABS

- Standard rolls are available in 36" and 48" wide. Custom options are also available.
- Cut rolls up to 48" wide to your precise length requirements, stacked solidly on pallets. Cut sheets stacked neatly on pallets lay flat and STAY flat.
- When thicker materials are needed, we can supply them using our 36" x 36" molds in 1 ¼", 1 ½", 2", and 3" thick.

CUSTOM MIXING

- Our North American compounding facility offers industry leading quality, and a complete line of polymers.
- Choose from any of the available compounds or work with our experienced technical team to develop your own exclusive formulation to match your specification requirements.
- In addition to black, we also have a mixer dedicated to colors. Our chemists can assist with color match requests to the specific pigment required.
- Available in different formats: mixer strips, slab stock, extruded sheets, and rolls.

SLIT WIDTHS

If you are still unrolling material and cutting to width by hand, we can save you the time. Consolidate those charges from sub-contractors and receive materials in the format that you want, from the supplier that you trust.

“Superior quality & service. A great group of people to form a relationship with. They helped me find a product substitute that my customer likes and continues to use to this day. They are like family, we have forged relationships that will last a lifetime.”

Maury Brown, Vice President / General Manager
Gardico Inc.
Trusting American Biltrite since 2000
QUALITY AND R&D

✦ Our sincere commitment to consistently exceed expectations for quality while safeguarding the environment facilitated obtaining our ISO 9001 and ISO 14001 certifications.

✦ Maintaining these certifications has proven very manageable due to our own large internal ISO team, and our pledge to continuously improve each process.

✦ R&D team of rubber experts dedicated to developing the right product for your specific application.

✦ All of our compounds are compliant with the Registration, Evaluation, Authorisation, and Restriction of Chemicals (REACH) and the Restriction of Hazardous Substances Directive (RoHS) because we use only pre-approved, first-rate ingredients.

✦ State of the art laboratory where chemists, engineers, and Ph. D.’s with over 100 years of experience in rubber chemistry work hand in hand on product development.

“We obtain a high degree of satisfaction from our customers who purchase products manufactured from the raw material we buy from American Biltrite. AB is a reliable company focused on customer satisfaction. For 3R, AB is a trusted partner!”

Mélanie Lapierre, Buyer
Industries 3R Inc.
Trusting American Biltrite since 1992

“A great experience working with their innovative, knowledgeable team and always amazed at their capability to obtain solutions. This company initiates regular discussions to address solutions to any issues we may be considering for the future.”

Jan Stinson, Manager – Supply Chain
TNR Industrial Doors Inc.
Trusting American Biltrite since 2004
CERTIFICATIONS AND SPECIFICATION
GRADES AVAILABLE

FDA Compliant – Formulated for safety when used in food applications, we offer Food and Drug Administration compliant products in stock in four polymers:

- Natural Rubber (NR)
- Nitrile (NBR)
- Ethylene Propylene Diene (EPDM)
- Neoprene / Polychloroprene (CR)

NSF / ANSI Standard 61 Certified + Meets AWWA Standards EPDM – Suitable for use in potable water applications, this product meets National Sanitation Foundation / American National Standards Institute Standard 61 requirements and the NSF 372 lead content compliance rule. It is the clean and safe option that complies with American Water Works Association Standard C111/A21.11. Made with FDA approved ingredients per 21 CFR 177.2600.

3A Sanitary Standards – Formulated for safety when used as a product contact surface for dairy & food processing operations.

Military Specifications – Specifically designed to meet the rigorous requirements of the U.S. Military.

AASHTO – Natural or Neoprene blends that meet the American Association of State Highway and Transportation Officials standard specifications for highway bridge bearing pads.
SALES & SERVICE TEAMS

A DEVOTED CUSTOMER SERVICE TEAM

At American Biltrite, our customer service takes pride in making each call a pleasant experience. Our team is professional and courteous, and much faster than scrolling through websites for order tracking and availability. Give us a call and get the best kind of service; the human kind!

Call us from 8 a.m. – 5 p.m. EST weekdays
Toll-free: 1-888-275-7075

- Industry-leading customer support and technical advice
- Commitment to serving our valued customers without compromise
- Customer service with an average of 20 years of American Biltrite experience

A DEDICATED SALES TEAM

Assisted by chemists, technical support, and marketing, they are the front line and your best resource to get you what you need fast.

“Exceptional Service Team. I look forward to calling. I would recommend AB because of the good quality products, they are knowledgeable, and have a great customer service and support staff. Thank you for making my job easy!”

John Hart, Sales / Product Specialist
Baldwin Supply Company
Trusting American Biltrite since 2000

The solid foundation that you can rely on to build your business.
WHY AMERICAN BILTRITE?

The American Biltrite difference is our first-rate quality paired with a sales and service team that redefines customer satisfaction year after year. As rubber pioneers, we use our knowledge and experience to develop high-quality products and offer exceptional customer service.

RUBBER EXPERTISE

- Experienced team of office and production employees with an average of 18 years of seniority
- On-site team of chemists, engineers, and Ph. D.’s that use their expertise to support product development
- ISO 9001 and 14001 Certified

CUSTOMER FOCUSED

- Industry-leading customer service
- Dedicated technical service team for assistance in product selection and troubleshooting
- A 30 member sales team, there when you need them
- Family owned for over 100 years

BEST-IN-CLASS PRODUCTS

- We offer a wide selection of engineered products, specifically formulated for unique applications.

BROAD RANGE OF PRODUCTS

- We offer the widest line of premium quality sheet rubber covering all major elastomers in various gauges, widths, and sizes, along with options like fabric reinforcement.
- Our domestic production allows us to answer your needs quickly with impressive lead times.
- Our imported sheet rubber is submitted to testing procedures on-site by our own team that are both rigorous and regimented.

FAST TURNAROUND FOR EMERGENCIES

- 10 fully-stocked warehouses that allow us to send you the products that you need immediately.
- Our committed sales team is on call, driven to assist you in growing your business.

“The sales and service teams are top-notch. They always keep us updated with new products and they are quick on getting back to us with any questions we have.”

Jeff Olson, Director of Sales
Applied Power Products Inc.
Trusting American Biltrite since 1996

**APPLICATIONS**

Basic gaskets, washers, skirtboard, scrapers, protective covers, and military applications.
**NEOPRENE / POLYCHLOROPRENE (CR)**

- Excellent adhesion properties
- Good inherent flame resistance
- Good resistance to weather, ozone, and natural aging
- Good resistance to abrasion and flex cracking
- Good resistance to alkalis and acids
- Moderate oil and gasoline resistance
- Available: White food grade (FDA compliant)

### APPLICATIONS

Gaskets, washers, military applications, FDA compliant for safety in food applications, and anywhere mild oil resistance is required.

Good general use material.

For rubber lining applications, please refer to the GUARD-RITE™ section on page 22.

For bearing pads, please refer to the ATLAS BEARING PADS™ section on page 27.

**FLUOROELASTOMER (FKM)**

- Temperature range: -20°F to 450°F (-29°C to 232°C)
- Excellent chemical resistance
- Increased sealing capability in aggressive environments
- UV & ozone resistant
- Resistance to liquid permeation in severe conditions
- Cinnamon scented for easy identification

**SILICONE**

- Temperature range: -80°F to 450°F (-62°C to 232°C)
- Excellent resistance to extreme temperatures
- Excellent resistance to UV, ozone, and weathering
- Highly resistant to erosion for a long wear life
- High tear resistance
- Low compression set
- Resists most fluids encountered in general industrial applications
- Resists deformation under severe thermal stress

# Fabric Reinforced Sheets & Diaphragm

- Maximizes conformity / resists deformation
- Reduces gasket creep where heavy flange loading is needed
- Ideal where mechanical fastening is essential
- Dimensional stability under high compression loads
- Several choices of polymers and fabrics

DURASHIELD®
PREMIUM NATURAL RUBBER FOR TEAR AND ABRASION RESISTANCE

DURASHIELD® is our heavyweight contender for tear and abrasion resistance. Formulated to extend the life of vital heavy-duty equipment, DURASHIELD® is the optimal choice for cement, aggregate, forestry, and mining markets. The ultimate in wear, tear, noise, vibration, impact, corrosion, and abrasion resistance.

APPLICATIONS
Linings, chutes, hoppers, cyclones, pipes, tanks, bins/boxes, silos, pulley lagging, shaker screens, sandblast curtains, squeegees, and pads.
For skirting applications or slit width needs, please refer to the skirtboard section on page 23.
GUARD-RITE™
ENGINEERED RUBBER LININGS FOR THE MINING INDUSTRY

GUARD-RITE™ is American Biltrite’s special line of products developed to meet the critical challenges of the rubber lining market for the mining industry. Engineered to cover an array of mining applications, GUARD-RITE™ products extend the service life of critical equipment and drastically reduce expensive downtime.

All GUARD-RITE™ products feature an adhesive-ready textured Polychloroprene (CR) bonding layer, allowing you to use the same adhesive system for the entire product line.

APPLICATIONS

Storage vessels, tumblers, vibrators, cyclones, fans, pumps, pipes, chutes, hoppers, shaker/trommel screens, bins, pulley lagging, truck boxes, mine cars, skips, slurry tanks, flotation cells, acid storage and transport (tanks, pipe, pump), limestone slurry tanks, ferric chloride storage and transport, fuel & oil handling/petrochemical, ponds, gutters, tailings dumps, and UV & ozone resistance.

NATURAL RUBBER PRODUCTS

TEAR-GUARD 40
TEAR-GUARD 60
ABRASION-GUARD
SUPREME-GUARD

NATURAL RUBBER SHOULD BE SELECTED AS THE PREFERRED SOLUTION TO RESIST:

Abrasion
Tear
Scratching
Gouging
Scraping

SYNTHETIC RUBBER PRODUCTS

CHEM-GUARD (BUTYL)
Chemicals
Alkalis, acids, and oxygenated solvents
Gases and vapor

HEAT-GUARD (ETHYLENE PROPYLENE DIENE)
Heat
Ozone and sunlight

FLAME-GUARD (NEOPRENE / POLYCHLOROPRENE)
Flame

FOR SOLUTIONS THAT RESIST THE FOLLOWING ELEMENTS/EXPOSURE, PLEASE SEE OUR SYNTHETIC RUBBER OPTIONS:

* For product selection assistance, including specific chemical resistance, please ask our technical department. For more detailed product information please see our technical specification data and product brochure on our website.
SKIRTBOARD
The best belts deserve the best containment. We are pleased to offer three grades of skirtboard for all of your skirting needs.

For applications that call for higher abrasion resistance than standard skirtboard solutions can handle – bring in our SKIRT-SHIELD® products, the heavyweight contender for maximum strength. It is DURASHIELD® in slit widths, perfect for any conveyor. SKIRT-SHIELD® is soft Natural Rubber that remains supple to increase belt life.

SKIRT-SHIELD® RED Optimal tear resistance
SKIRT-SHIELD® A+ ORANGE Ultimate abrasion resistance
For industrial grade SBR skirtboard with good tensile strength, take a look at our IM-165.
For basic commercial grade SBR skirtboard please find our IM-166.

This formula has been a staple in the market for years
More than 30 sizes available in-stock, certain sizes with beveled edge
Available in 48” width for general purpose sheet applications and for your own slitting needs
We stock full-width rolls in 1/16”- 1” thick

NSF / ANSI STANDARD 61 CERTIFIED ETHYLENE PROPYLENE DIENE (EPDM)

Suitable for use in potable water applications, this product is NSF / ANSI Standard 61 certified by NSF International and meets the NSF 372 lead content rule for the cleanest and safest option for drinking water and wastewater purposes. This certification was obtained from extensive product testing and requires multiple audits by NSF International in our manufacturing facility to ensure product safety.

+ Excellent resistance to heat, ozone, and sunlight
+ Superior resistance to cold and hot water
+ ASTM Grade (D2000: 1BA715Z1)
+ Meets American Water Works Association Standard C111/A21.11
+ Made with FDA approved ingredients per 21 CFR 177.2600

FDA & 3A SANITARY STANDARDS COMPLIANT PRODUCTS

Our FDA compliant products are specifically formulated for safety when used in food applications. Tasteless, and non-toxic, these rubber products display a natural resistance to bacterial growth. We offer food grade products in Nitrile (NBR), Natural Rubber (NR), Ethylene Propylene Diene (EPDM), and Neoprene / Polychloroprene (CR). Meets the requirements for FDA 21CFR 177.2600 and 182.8991. Our AB-366 Nitrile product also meets 3A Sanitary Standards, making it safe for dairy processing operations.

H - High resistance, M - Medium resistance, L - Lower resistance
General guidelines, please see our technical data sheets and product brochure on our website for more details on the physical properties of each product.

APPLICATIONS

General gaskets, counter tops, non-slip pads, and skirting used in food processing. You can also find FDA rubber products in butcher shops, pharmaceutical processing, commercial kitchens, hospitals, food processing plants, the cosmetics industry, industrial plants, and grocery stores.
TRANSEAL®
PREMIUM NITRILE FOR TRANSFORMER GASKETS

TRANSEAL®—the environmentally responsible choice for transformer stability

Engineered specifically for use in electrical transformers, TRANSEAL® is the ideal product for use in and around electrical equipment to maintain stability and prevent environmental damages. TRANSEAL® resists oil leakage reducing the risks of soil contamination, health & safety issues, and unexpected downtime.

- Unrivaled compression set values: 9% represents a typical test result. Standard Nitrile and cork options can run from 45% to over 75%.
- Silicone based oils have little effect on the TRANSEAL® compound
- Wide range of service temperatures

Approved for use by Hydro Quebec (SN-14.1), Tennessee Valley Authority, and meets G.E. and ABB M4094E specifications.

APPLICATIONS

Where second-guessing a transformer gasket is never an option. All transformers should be manufactured and maintained with premium TRANSEAL® gaskets, specifically engineered for this unique application.
ATLAS BEARING PADS™
FOR HIGHWAY AND BRIDGE CONSTRUCTION

Natural or Neoprene / Polychloroprene blends that meet the AASHTO* standard specifications for highway bridge bearing pads.

+ Designed to evenly transfer the load from the beams to the supports in bridge bearing and structural applications
+ Absorb the movement and vibration caused by expansion and contraction
+ Also recommended wherever a high-grade, STRONG Neoprene / Polychloroprene or Natural Rubber is required

### APPLICATIONS

- Pre-cast, pre-stressed concrete, buildings with structural steel beams, steel reinforced concrete, industrial machinery / heavy equipment foundations, railway tie pads, shock and vibration isolation, pads between girders and columns, pads between substructures, new construction and rehabilitation of existing structures, buildings, arenas, tunnels, and infrastructure.

**BLAST®**

**SELF-HEALING NATURAL RUBBER FOR BALLISTICS**

Bullet, lead, and shrapnel-shield technology. BLAST® is our proven Natural Rubber solution for the ballistic market.

+ High tear resistance and self-healing qualities
+ Ideal for positioning between targets and bullet traps or on the walls of shoot houses
+ Prevents the return of bullet fragments, shrapnel, and lead dust
+ Contributes to a safer and cleaner shooting environment
+ New paper finish available for laser shot, projected imagery, or anywhere glare is a factor due to lighting

**APPLICATIONS**

Ballistic applications including curtains, bullet traps, screens, laser shot, projected imagery, and glare-free applications.
# U.S. Military Specification Grade

Specifically designed to meet the rigorous requirements of the U.S. Military

- MIL-6855 class 2: Premium grade Neoprene / Polychloroprene with excellent weather and ozone resistance
- MIL-PRF-1149 class 1: Oil resistant Neoprene / Polychloroprene with good flame, abrasion, and flex cracking resistance
- MIL-PRF-1149 class 2: Styrene-Butadiene rubber for gasket applications

## Applications

Military and defense applications.

EMPLOYEE TESTIMONIALS

What makes my days the most enjoyable is definitely the people I work with. Whether in my immediate team or in other departments, every day I meet professional and friendly people. Apart from the pleasant atmosphere, I can say that we are treated well. People say that I am a devoted person. I do not hesitate to talk with external stakeholders when necessary so that people get full satisfaction in solving their problem. I believe that every person at American Biltrite is committed to quality work and to raising standards both in terms of products and internal services. This leads everyone to excel each day.

VANALY PORLIER
Human Resources Generalist
Employee since 2012

Our products are representative of the caliber of people working here at American Biltrite. Our management makes sure that we never waiver in our commitment to continuously improve each process. Our quality makes promoting our line to our customers a natural reaction. When you believe in what you are offering, you back it up with 100% dedication. That is what American Biltrite does each and every day, and I feel very fortunate to be a part of this team. It makes coming to work a positive experience when you admire the people that you work with.

TRACEY LANCASTER
Marketing Manager
Employee since 2011

In one word, American Biltrite has a HERITAGE that we must preserve by continuing to innovate in the global market. Maintaining a uniform quality level and defying all competition. And to preserve this long-term strategic vision, every employee, regardless of the level of responsibility they occupy, is a very important member of the team.
So, let’s do rubber, our specialty and quality, our heritage, our pride!

JOSÉE GAUCHER
Quality Assurance Supervisor
Employee since 1993

We are versatile. We have a very large production and supply capacity, and this allows us to meet the demands of customers and distributors on time. I am proud to be a part of a company that is committed to reducing it’s environmental footprint and makes it an objective to develop the skills of employees.

PIERRE-LUC LAMARRE
Distribution Center Clerk
Employee since 2016

I am a people person, and I like that portion of my work. I think that a customer who is happy and feels that he is supported, will be more willing to buy from us. We are devoted to customers- we do ALL that we can to help them, service them, and support them in all ways.
