SHEET RUBBER

HEAT AND CHEMICAL WELDING

Chemical Welding of Sheet Rubber

- **Make Sure the Cut is Straight and Perfectly Perpendicular**

- **Lightly Apply the Chemical Weld Product**

SHEET RUBBER

HEAT AND CHEMICAL WELDING

- **Lay the Other Strip Close to the Other Piece Very Carefully**

- **Wipe the Seam with a Damp Cleaned Rag**

SHEET RUBBER

HEAT AND CHEMICAL WELDING

General Information

- When ready to shave the hot weld strip, we suggest you use a soapy solution that you will apply on top of the lukewarm strip to shave off (the seam) then shave off the excess rod (use a good quality liquid dish washing soap, one cap in a gallon of water).
- We suggest you use a 5mm speed tip.
